- Gift Cards
- Vip Cards
- Prepaid Cards

HIGH QUALITY & USER FRIENDLY CARD PRINTING

With the Rainbow software you can import and edit image files in a simple and straight forward manner. Management of the layout is immediate. What You See Is What You Get!

IMMEDIATE ACCESS AND MANAGEMENT OF VARIABLE DATA

Thanks to the application OLEDB, ODBC, Rainbow can easily interface with other software programs, creating easy access to information available from an existing database, and from programs such as Access, Excell and DBase.

Rainbow can easily manage variable data and make different combinations of them on the card i.e. data, time, etc.

MAIN FEATURES

| | |
|---|---|
| 32 bit application WYSIWYG Multi User Functionality | runs under Microsoft Windows 2000/XP/VISTA eliminates the need of print preview different users may have different access privileges (layout editing, job set up, etc...) to these applications.
